Academic Technology Committee Home

The Academic Technology Committee (ATC) envisions North Park as a collaborative community that uses technology effectively for innovation, teaching, and learning.

We're a group of faculty and staff—representing a wide range of disciplines and departments—who are passionate about using the tools we have available to teach and learn together. Along with offering training and resources for specific technologies, ATC tests new software, funds grants, and works to find campus-wide solutions to campus-wide technology challenges.

ATC Grants Available

**Faculty & Staff Apply by March 9th, 2018**

The Academic Technology Committee was established to support, encourage and advance the use of technology across the North Park University campus. One key avenue for this is the Technology Grant Program, which is currently accepting proposals. In previous years, we've partnered with Brandel Library, the School of Education, the Physics Department, the Athletic Training Educational Program, and more.
