

"Connect It"

What the "Connect It" system looks like.

Newer classrooms utilize the Crestron "Connect It" system. This system communicates whether a device has successfully connected to the display via a laptop light indicator.

Simply connect the HDMI or VGA cable to the device and the system (TVs and other equipment) will automatically turn on.

Connections available: HDMI & VGA

Instructions:

1. Walk into room
2. Turn on device (laptop)
3. Log into the computer
4. Plug in appropriate cable (laptop screen should blink)
5. WAIT for system to turn on. When ready, your screen should display on one of the TVs.

LAPTOP LIGHT INDICATOR:

The *Connect IT* system has the ability to tell when the laptop has connected to the system successfully by using light communication indicators. Here are the colors of the lights and what they mean:

(2) multicolored LED indicators:

Blue (solid) – Indicates that the system is off

Green (solid) – Indicates that the system is on and the computer device has successfully connected
