

How to Connect to a Mobile SMART Podium

Illuminated function buttons

Access common functions, such as the eraser and mouse, open SMART Meeting Pro software and launch the On-Screen Keyboard – the buttons illuminate in low light for easy viewing.

Widescreen display

A 16:9 widescreen resolution and flexible scaling options enable you to display and manipulate high-definition visuals.

High-speed USB 2.0 ports

Easily connect multimedia devices to the three accessible ports.

Accurate writing experience

Control your computer and write precisely in digital ink with the tethered pen that is always available when you need it on the magnetic pen rest.

Smooth Tilt Stand

Adjust the angle of the interactive pen display to your most natural writing position – even rest your hand on the screen while you write.

Elegant design

SMART Podium features a sleek profile and slim bezel for optimal active screen area and a minimized overall footprint. It will complement virtually any workspace.

SMART Meeting Pro software

Write notes on whiteboard pages or over any application – then save and share them with others.

SMART Podium Set-up

If you would prefer to use the smart podium versus the Sharp interactive screen, then you can have access to a Smart Podium mobile set up. The mobile setup is comprised of a Smart Podium SP524, a cart and a HDMI connection cable.

Here is what you will need:

1. Laptop with HDMI connection port
2. USB port on the same laptop
3. Smart Podium Mobile Cart: Rolling Cart with power extension cord, USB cable, HDMI cable, power cord, and Smart Pen
4. Access to Air Media

Here is how you can connect:

1. Make sure that the Smart Podium is plugged in and turn on
2. Make sure that the Laptop is turned on and you have logged in
3. Take the HDMI cable from the SMART podium marked "to computer" and plug it into the HDMI port of the computer, you should see the computer image on the SMART podium
4. Take the USB cord marked "to computer" and plug it into any of the usb ports on your computer. Your computer should now be interactive with the SMART pen.
5.
 - a. Connect to AIR Media by following the instructions in the provided link: [Air Media](#)
or
 - b. Connect HDMI from Room to SMART podium HDMI port
